FOR IMMEDIATE RELEASE

### **PSI Semicon Services to exhibit at SEMICON West 2011**

Plano, Texas – PSI Semicon Services, the world’s largest independent repair service and ILS (Integrated Logistic Supplier) provider to the semiconductor industry, will showcase its full line of capabilities, including the industry’s largest array of repair and cost-saving ILS services, at SEMICON West 2011. PSI Semicon Services uses the latest technology to diagnose, evaluate, repair, calibrate and test the most advanced semiconductor manufacturing equipment in the market today.

SEMICON West is billed as the premier event for the display of new products and technologies for microelectronics design and manufacturing, featuring technologies from across the microelectronics supply chain, from electronic design automation, to device fabrication (wafer processing), to final manufacturing (assembly, packaging and test). The event takes place July 12-14 at the Moscone Center in San Francisco, California. PSI Semicon Services will be exhibiting in booth 407.

“PSI Semicon Services is an avid supporter of SEMICON West,” said Mike Fitzpatrick, General Manager of PSI Semicon Services. “It is a terrific forum for us to share our wide variety of repair services and unique ILS cost-saving options with industry professionals.”
